

Testimonials

Corwin Toyota Testimonial

“We at Tim Corwin Toyota / Scion are extremely pleased with our three-bay EnviroLube quick lube service bay system. Our employees working in the quick lube area are very happy with the system and are impressed at how easy it is to keep clean. The efficiency of working on vehicles has greatly increased our ROI. We have gone from taking 25+ minutes to do an oil change, rotate and inspection on our old hoists to less than 15 minutes with EnviroLube.

When I take people on a tour of our new state of the art Toyota dealership the EnviroLube is always one of the highlights of their tour.

It was great working with you and your team on the installation and set up of this system. If you ever need a place to show your system in an actual working environment or a contact to discuss EnviroLube please don't hesitate to give them my name.”

Maita Automotive Group Testimonial

"We purchased our three-bay EnviroLube over 12-years ago and consistently service between 120 and 150 cars per day. Our quick-lube center has proven to be one of the highest profit and greatest return-on-investment departments within our dealership's service area. EnviroLube is easy to keep clean and still looks great after servicing over 500,000 cars."

Gary Kiser, Operations Manager, Maita Group of Dealerships, Sacramento, CA.

Greatwest Kenworth Testimonial

“We are extremely pleased with our choice of EnviroLube for our new maintenance facility at GreatWest Kenworth in Lethbridge, Alberta, Canada. EnviroLube is extremely well lit, which helps our technicians clearly see the underside of a rig and identify problem areas. EnviroLube is very easy to keep clean and the well laid out workspace has plenty of room for technicians to do their job efficiently. An added impact is that our customers are very impressed seeing we have added new technologies such as EnviroLube into our building.”

Mr. Paul E. Storwick
President – COO
GreatWest Kenworth
Lethbridge, Alberta, Canada

Greatwest Kenworth Press Release

Greatwest Kenworth invites you as they go green with EnviroLube!
Greatwest Kenworth Trucking Ltd. first in Canada to install the EnviroLube system
LETHBRIDGE, AB, Jan. 8 /CNW/

Location: New Kenworth Truck Construction Site
3995-2nd Ave. North
Lethbridge Alberta, T1H0C8

Greatwest Kenworth Trucking Ltd., goes green by choosing the EnviroLube system as their service bay equipment provider. EnviroLube offers the most environmentally conscious option in the industry and the Lethbridge Greatwest Kenworth Dealership is the first Canadian outlet to install this cutting edge technology, which is distributed nationally by Stewart Warner Alemite Lubrication Equipment.

Bob Laidlaw, Greatwest Kenworth Trucking Ltd. says they chose EnviroLube because their company wants to be a leader in the industry. "Our ownership is very forward thinking and always looking for the latest ideas and concepts to make sure we are up to date, especially when it comes to the environment."

EnviroLube is an all fiberglass composite structure and an environmentally safe alternative to the standard concrete service pit. EnviroLube's fiberglass structure is non-porous preventing the seepage of oil and other contaminants back into the environment.
